

Let's move on

Bruynzeel Electro Solutions

 **bruynzeel** filing and storage

FOCUS ON CUSTOMER SATISFACTION

The benefit of choosing Bruynzeel

Developments in electronics continue to impact all of our lives in terms of comfort, control and convenience. Today, there is a new emphasis on simplicity. The operation of products is virtually intuitive. This has led to changing market expectations, whereby the same level of control is expected in all walks of life including the workplace. Where today there is a new emphasis on health, safety and ergonomics. In response to these developments, Bruynzeel has developed a new range of mobile Electro solutions specifically designed for convenience and simplicity.

Harnessing the power of electronics, to ensure simple and effortless operation. There is a complete Electro solution for each and every mobile requirement for true operating convenience at an affordable price.

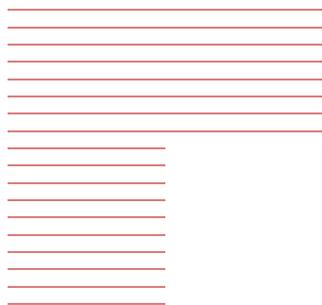

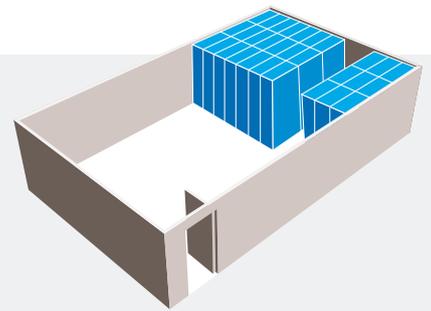

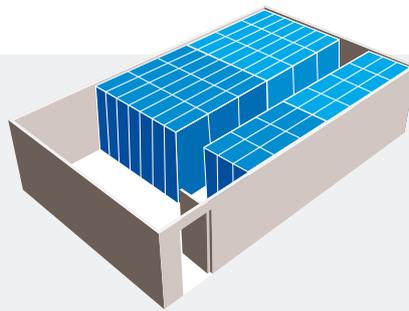

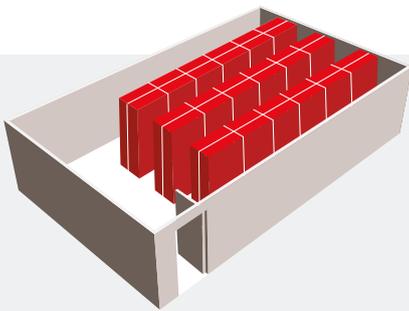

From our market research we know you value this kind of performance. Read on to find out how you can move to a new level of operating convenience, comfort, safety and efficiency in archive and storage with Bruynzeel Electro solutions.

Focus on innovation

Bruynzeel Electro solutions come in a complete, ergonomic range designed around the needs of users and suitable for virtually any office, archive or retail storage application.

Mobile storage solutions have many advantages over static shelving, which requires space between every rack for accessing the stored material. With floor space at a premium cost, the extra room gained can be utilised for more storage, or to create an extra workstation.

Compactus® solutions make optimum use of the available space by using only one access aisle. The mobile units can be moved either singly or together to create an aisle wherever access is required and can virtually double your storage capacity.

 **bruynzeel** filing and storage

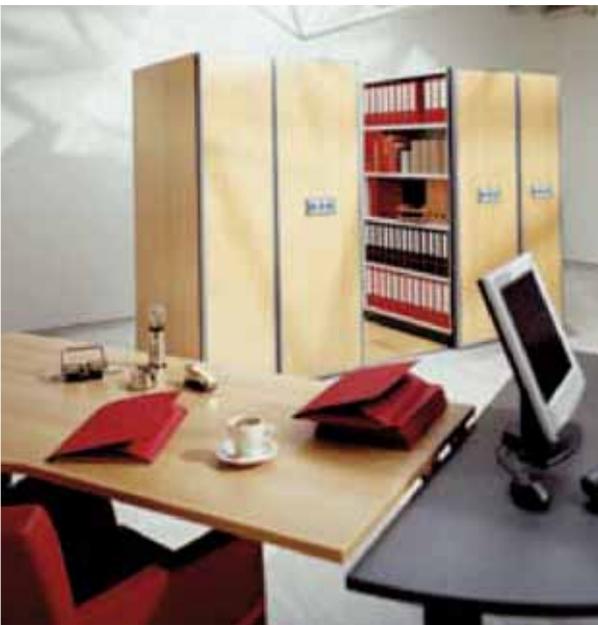

FOCUS ON CUSTOMER SATISFACTION

COMPACTUS® OFFICE ELECTRO

Combining comfort and design

Electro Solutions

Mobile storage solutions have many advantages over fixed cabinets in terms of efficient utilisation of space. Only one access aisle is needed. The mobile units can be moved singly or together, to create an aisle as and where access is required. A great space saving concept. And with the convenience of ergonomic electronic control, operation is simple and movement effortless. With electronics impacting every aspect of our lives, why settle for less at work?

Compactus® Office Electro: focus on convenience

A simple touch panel activates the Compactus® Office Electro. Even if your hands are full, operation is no problem - the touch panel allows you to move the Compactus® Office Electro simply at high speed.

To accommodate all users, the touch panel can be positioned on the mobile front panel at any suitable height.

Compactus® Office Electro: focus on simplicity

The touch panel has been designed for simplicity in use. Controls are self-explanatory so that no specific training is needed.

Compactus® Office Electro: focus on safety

User safety is ensured by the Motor Current Monitoring System (MCMS). This system detects when pressure has been applied to a moving unit by a user or blockage in the aisle and ensures immediate shut down.

Compactus® Office Electro: focus on design

Compactus® Office Electro fits flexibly around your needs. The specially designed front panels can be finished in a range of colors and materials to match your office interior. Helping to ensure a tasteful, enjoyable working environment.

COMPACTUS® ELECTRO

True simplicity in operation

Electro Solutions

The simplicity of the electronic control that powers Compactus® Electro means that convenience comes at a price, competitive with hand-crank operated systems. A clear and simple touch panel gives you fast access to goods, with a high degree of safety and operating comfort. The most important daily requirements for an archive or store.

Compactus® Electro: focus on convenience

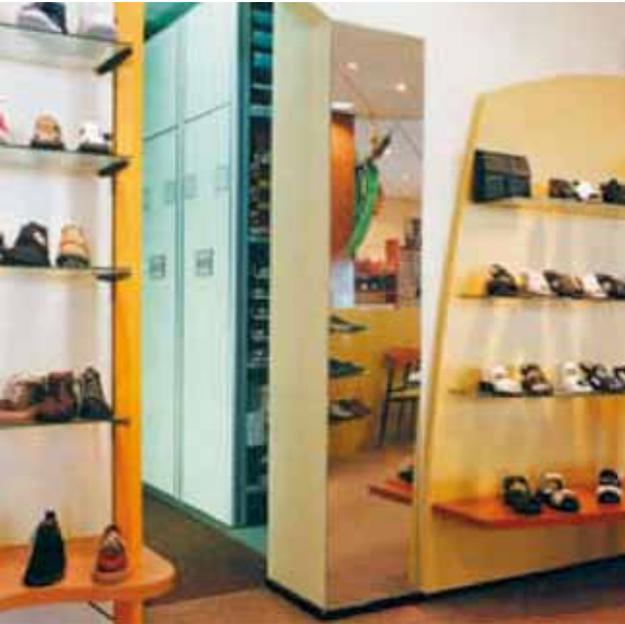

One-touch operation via the touch panel provides unparalleled ease of operation of the Compactus® Electro System - even if you have your hands full. A single, gentle touch is all that is needed to provide smooth access to the spacious interior of this latest, innovative addition to the Bruynzeel range.

Compactus® Electro: focus on protection

Vibration-free movement, thanks to the soft start and soft stop facility, ensures that documents stay in place during retrieval. Photoelectric cells can recognize goods that may have been left behind in the aisle and ensure immediate shut down. Preventing any accidental damage.

Compactus® Electro: focus on safety

User safety is ensured by the Motor Current Monitoring System (MCMS) and photoelectric cells. These features stop the mobiles, should another user attempt to move the installation while a person is still inside it.

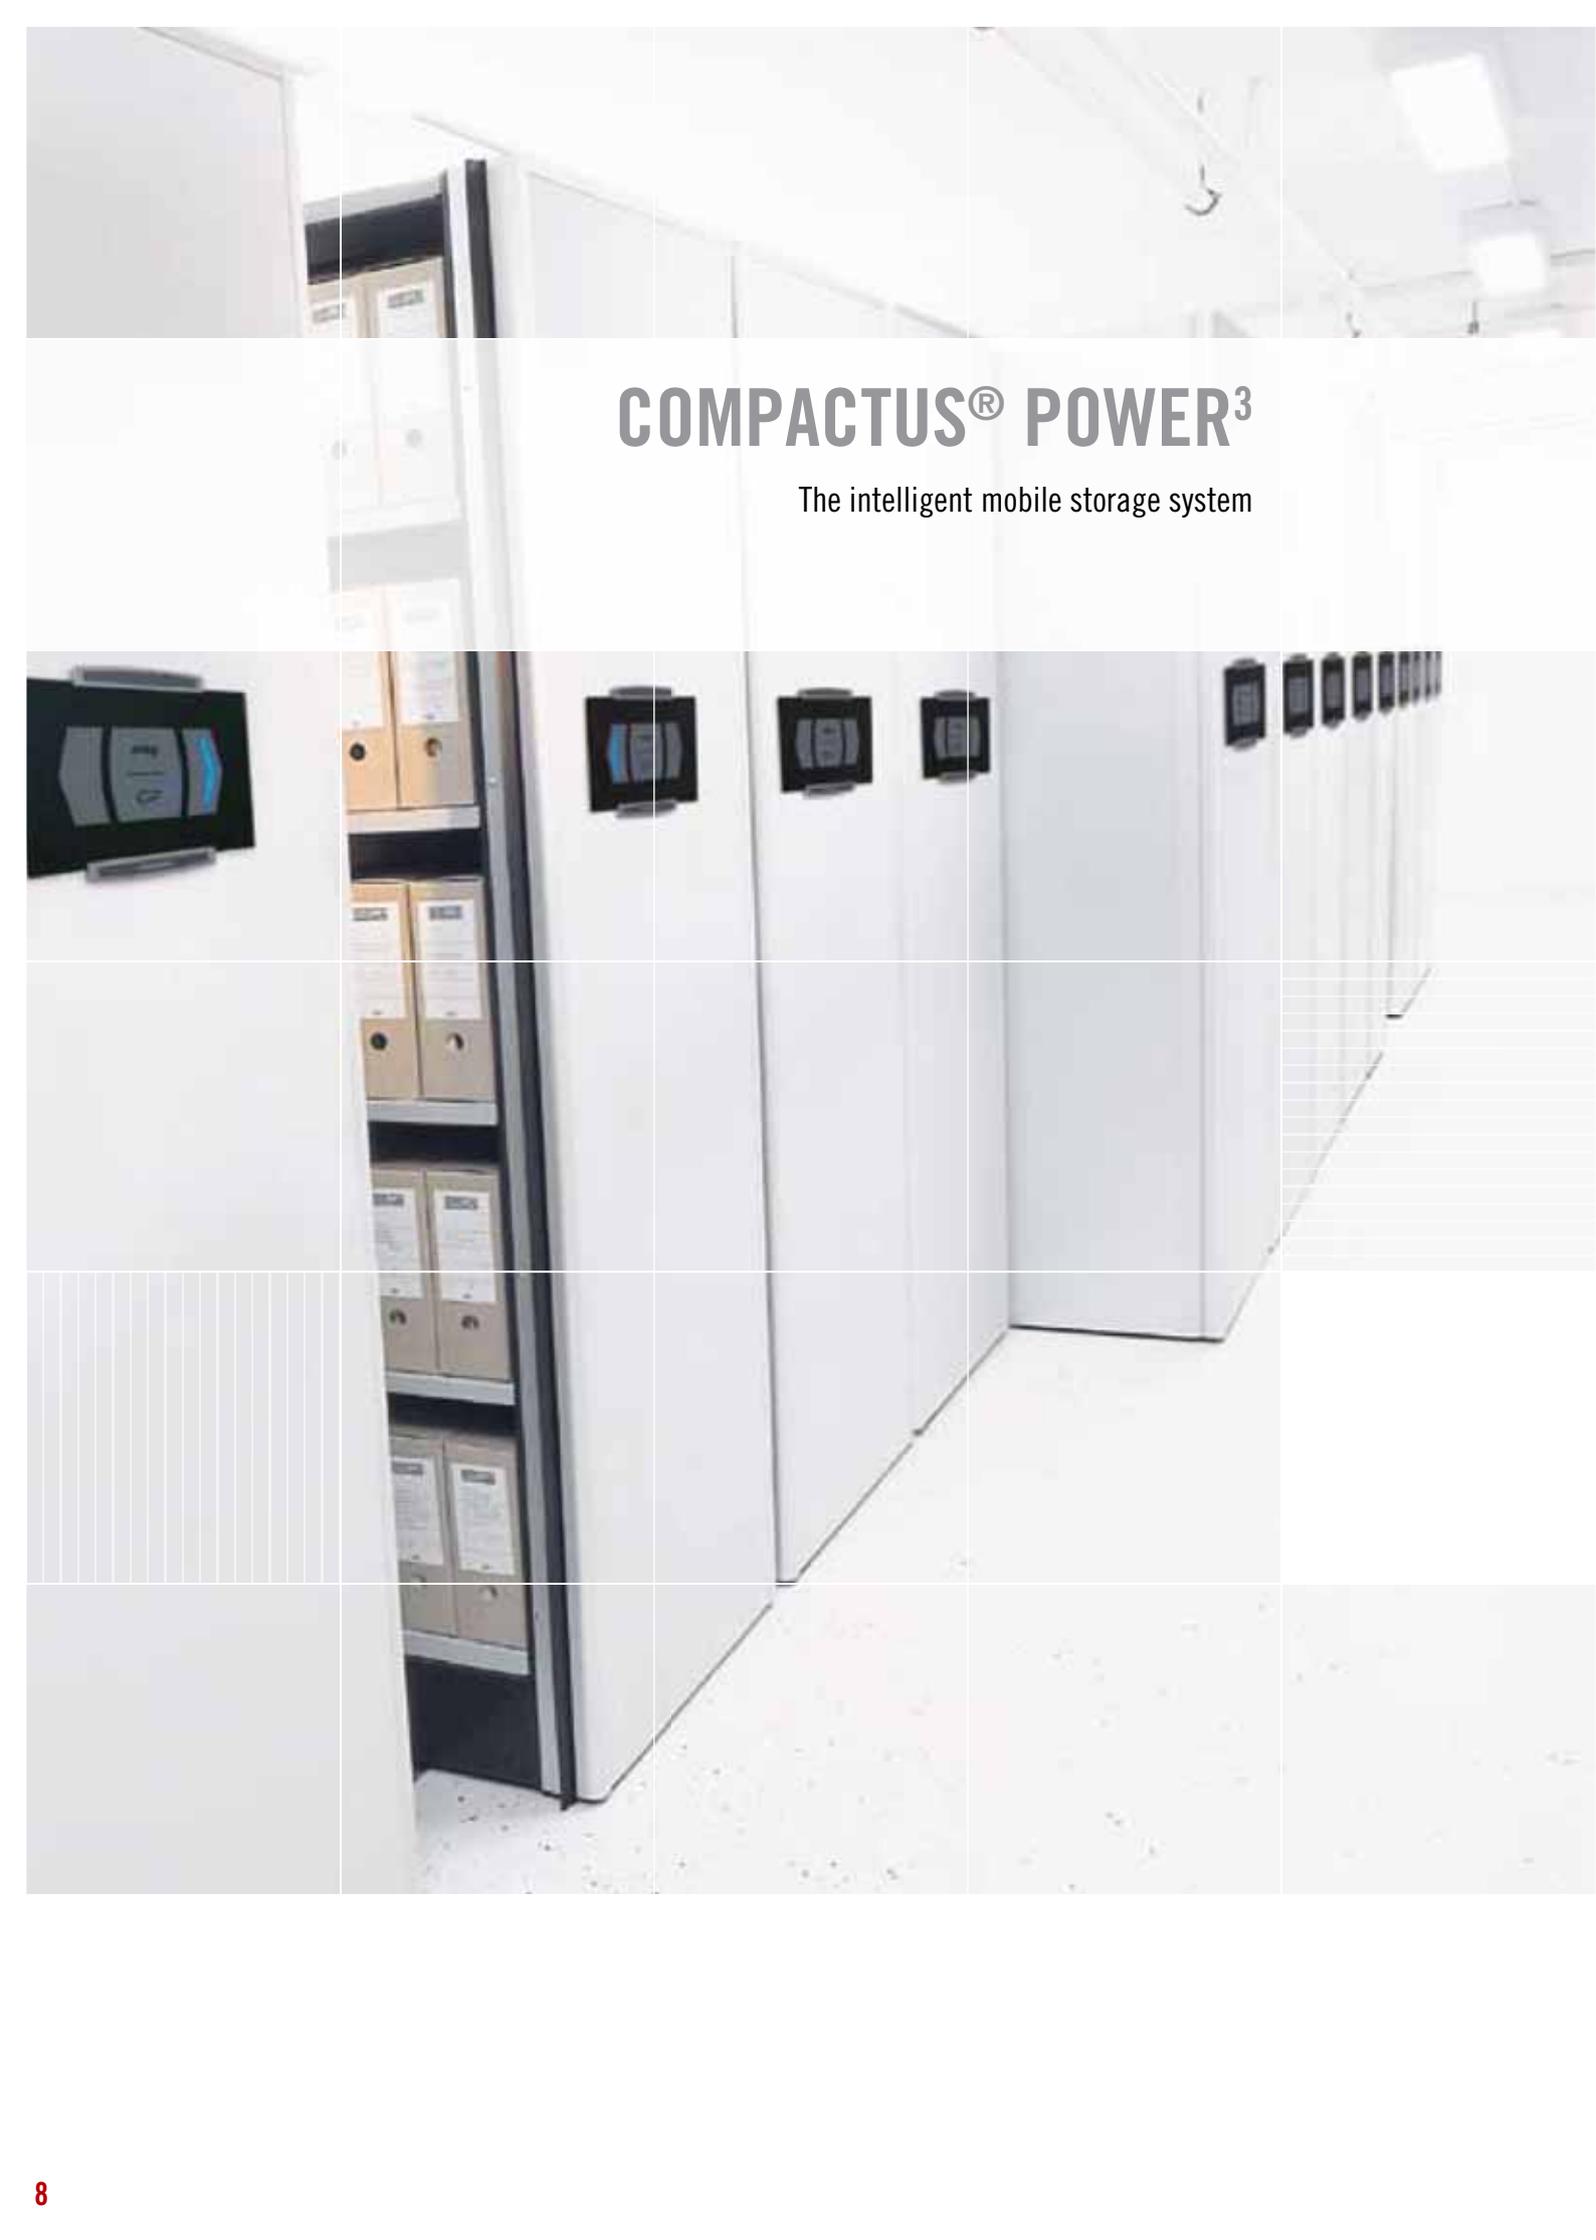

Space saving storage

Photoelectric cell

COMPACTUS® POWER³

The intelligent mobile storage system

Electro Solutions

Best protection

High loads and long mobiles? No problem! The one-touch control of the touch panel provides easy and effortless operation of the Compactus® Power³ System. Compactus® Power³ moves at a constant speed independent of its load or length. The intelligent electronic control and drive not only brings optimum ease of use, but also the best in operating safety, the protection of goods or files and confidential, secure storage.

Compactus® Power³: focus on user safety

Thanks to a number of innovative operating features, you will always feel comfortable and safe when using the Compactus® Power³.

- The inbuilt Motor Current Monitoring System (MCMS) detects when pressure has been applied to a moving mobile and ensures immediate shut down.
- Passive Safety restricts mobile movement until the user checks the open aisle and deactivates the touch panel on both sides of the aisle.
- Compactus® Power³ also interfaces with other safety devices, including photoelectric cells.

Compactus® Power³: focus on security

To prevent anyone having unauthorised access to your documents, different aisles can be restricted to specific personnel or departments. Programmable access tags provide 250 unique security authorisations guaranteeing secure filing of your documents and goods while giving you the option to log all visits to the archive. Access authorisations

can easily be changed remotely from a PC with no specialised training, no system downtime, no costly refitting of locks and no compromise in security.

Compactus® Power³: focus on conservation

Compactus® Power³ offers multiple features to ensure the best protection of the stored goods in the right conditions.

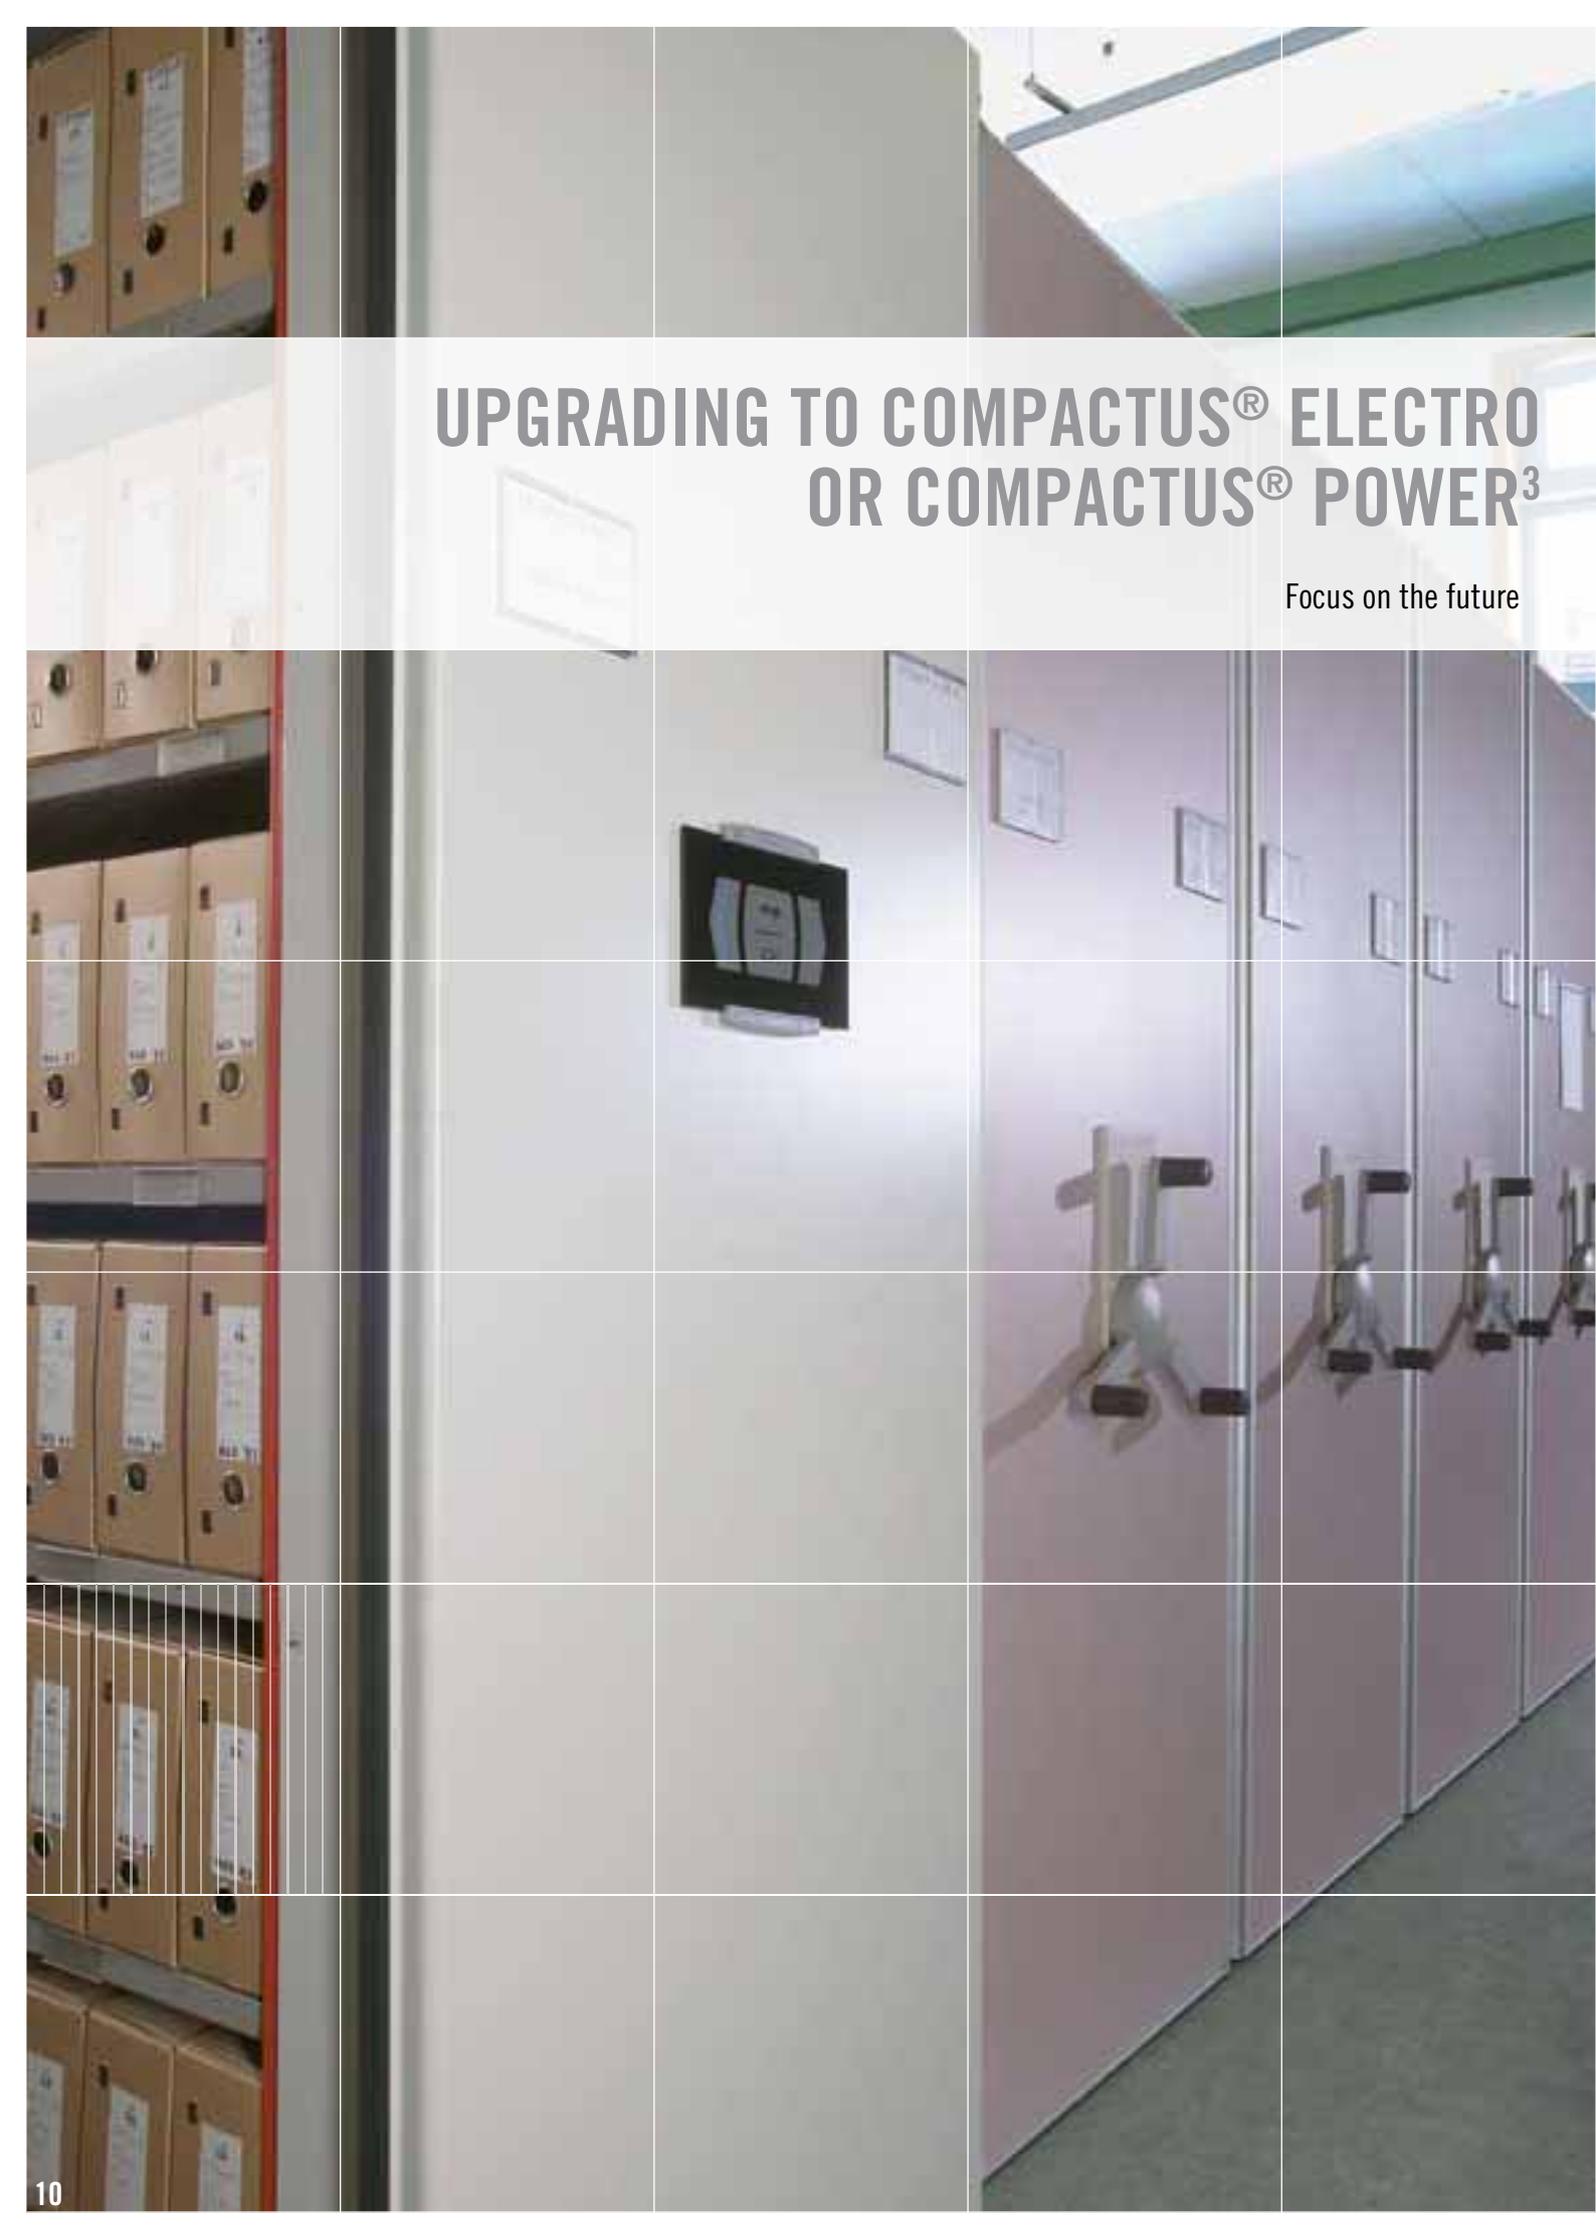

- Vibration-free movement, thanks to the soft start, soft stop facility, ensures that all goods stay in place during retrieval.
- Do you need to stock oversized items at times? With Compactus® Power³ you can store and retrieve them safely. Damage is prevented by an easy adjustment of the mobile stopping distance.
- And to provide the best protection for your goods and files, Compactus® Power³ can interface with safety and environmental systems including fire alarms, temperature, lighting, humidity and ventilation control. Automatic mobile response to system activation and night mode positioning are integrated in the control software.

Compactus® Power³: focus on flexibility and simplicity

The Compactus® Power³ contains an intelligent controller for simple plug and play installation. In combination with the wide variety of settings, this results in the highest possible flexibility. Using a service tag, programming the system is quick and easy and requires no special training or technical skills. Adjusting the mobile stopping distance, converting mobile shelving to stationary shelving or programming authorisations is done quickly and easily. With a PC interface the system also allows remote programming. Moreover, the control software can be upgraded to comply with future requirements and legal guidelines.

User friendliness

UPGRADING TO COMPACTUS® ELECTRO OR COMPACTUS® POWER³

Focus on the future

Electro Solutions

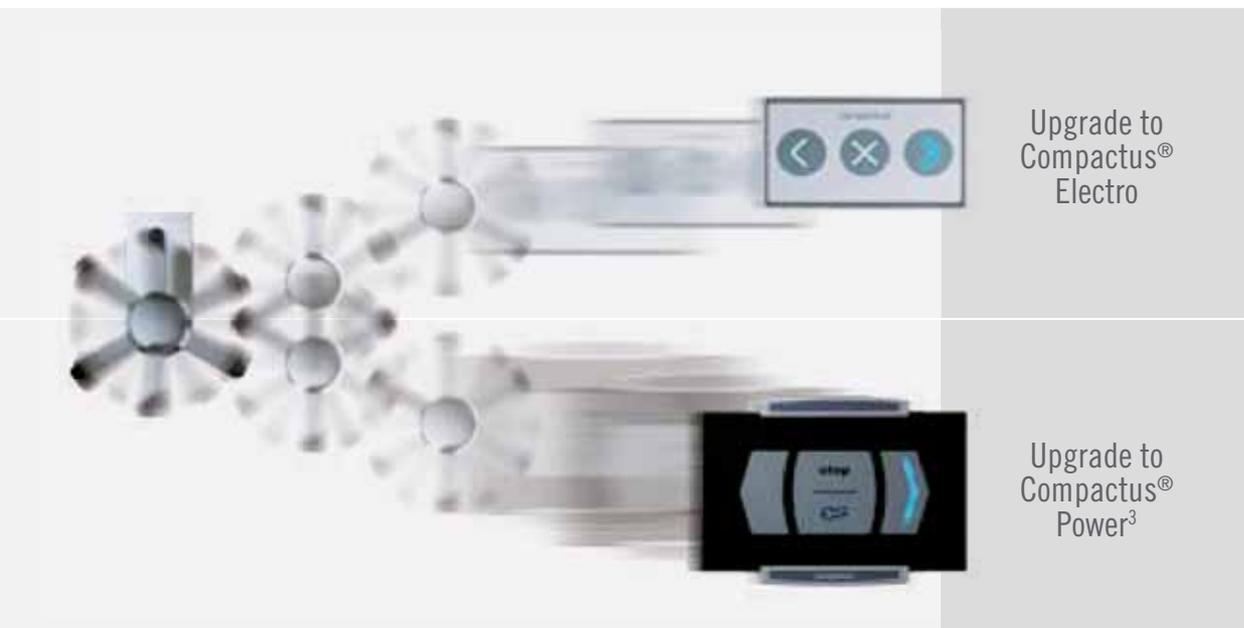

Nothing is as constant as change. Changing requirements within an organisation, or where an out-dated system is still in use, can be easily accommodated by upgrading the existing system to Compactus® Electro or Compactus® Power³. Bring the convenience of electronic control to your working environment.

Upgrading: focus on meeting new demands

Whether you use hand-crank driven or existing electrically driven installations, you will benefit immediately from the improvements in operating efficiency and ergonomics provided by upgrading to Compactus® Electro or Compactus® Power³. And there are major advantages in making the change with a trusted supplier like Bruynzeel. As part of the upgrade, front panels will be replaced, making your installation look as new.

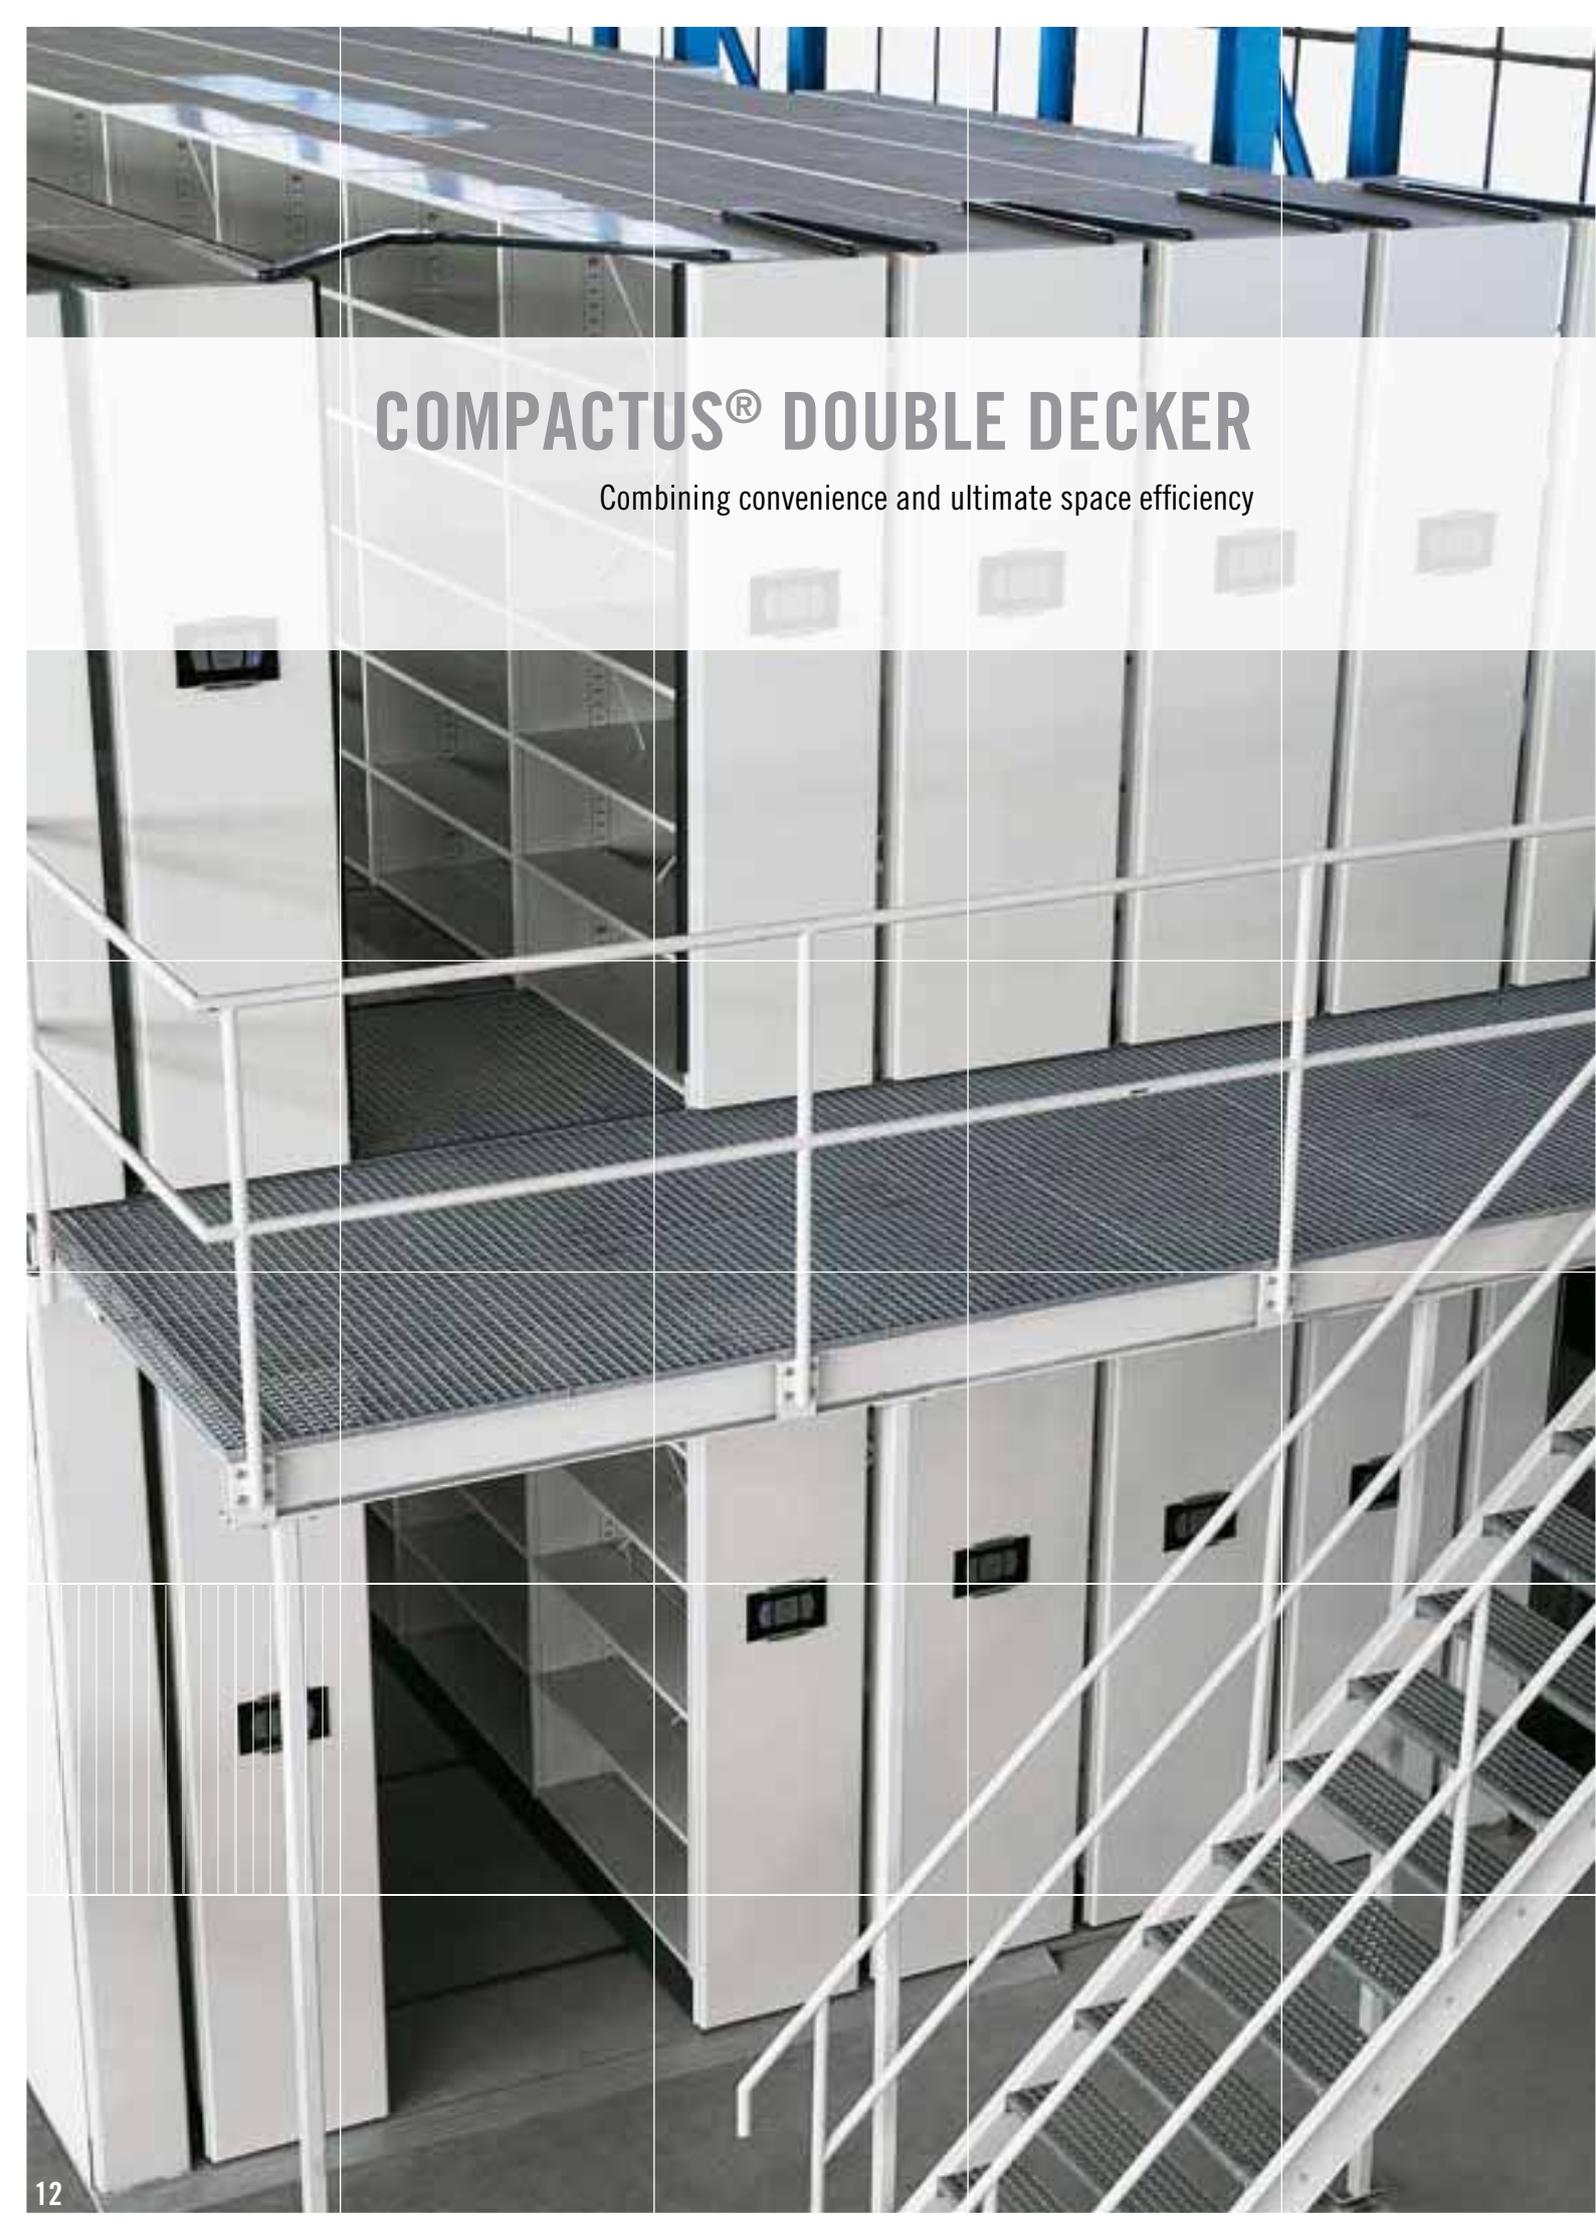

Upgrading: focus on continuity

Replacing an installation can cause major disruption. Your files will need to be stored temporarily elsewhere limiting your access to them. Bruynzeel can offer an upgrade option that avoids these problems. All that you need to do to achieve this, is in worse case to empty the lowest shelf of the first section. This saves you time, additional costs and helps you avoid the upheaval that changeover can cause.

COMPACTUS® DOUBLE DECKER

Combining convenience and ultimate space efficiency

Electro Solutions

Ultimate efficiency in use of space is offered by the convenient Compactus® Double Decker. It provides the best space efficiency for higher rooms with all the benefits of Compactus® Power³ in an innovative concept.

Compactus® Double Decker: focus on innovation

Compactus® Double Decker consists of mobile units with 2 levels of shelving and a mezzanine construction. The 2 levels of shelving are connected by a specially designed wheel console. As a result, the weight of both levels is carried by the mobile units. The mezzanine construction only carries the weight of people and needs limited strength.

Compactus® Double Decker: focus on user friendly and safe operation

The one-touch operation of the touch pad provides simple user friendly and safe operation on both levels.

- Vibration-free movement, thanks to the soft start and soft stop facility, ensures that documents stay in place during

retrieval. Shelving moves at a constant speed, irrespective of its load.

- Steel gratings offer a clear view of the level below.
- For even greater working comfort, the system can be fitted with automatic aisle lighting, to help you retrieve the file you need, when you need it.

Compactus® Double Decker: focus on protection

The intelligent electronic control and drive not only brings optimum user safety, but also the best in the protection of goods or files and confidential, secure storage.

Automatic aisle lighting

SELECTION GUIDE

Bruynzeel Electro solutions come in a complete, ergonomic range designed around the needs of users and suitable for virtually any office, archive or storage application.

Designed for simple, intuitive operation. No training is required.

Application	Requirements	Compactus® Solution	Maximum mobile load	Maximum system depth	Section heights	Maximum section load	Section width	Section depths	Floor fixing
Office: shared and group storage.	Saving office space. Medium to high capacity office storage. Low to high use. Good ergonomics and high user safety. Flexible design adapting to office interior.	Compactus® Office Electro	2.5 tons per base	3600 mm	1194 to 2234 in 40mm increments	375 kg	800, 1000, 1200 mm	250, 270, 300, 320, 350, 390	In concrete floor and raised floor

Bruynzeel quality & service

Bruynzeel: focus on quality

Whichever storage system best meets your demands and wishes, Bruynzeel offers you important added value: quality. Bruynzeel has been developing and producing storage and filing systems for more than fifty years. All of our systems can be provided as customised, high-quality solutions. Our products are characterised by sound construction and are finished to perfection, down to the very last detail. All our products comply with major international quality standards.

Bruynzeel: focus on guarantee

Bruynzeel offers a standard 1-year guarantee on all Electro solutions. We also offer maintenance contracts for all Electro solutions, allowing you to extend the guarantee period. As a well-established company, and part of Aker Material Handling, a large international group, we can offer our clients continuity in the years ahead.

Bruynzeel: focus on customer satisfaction

Years of experience have made Bruynzeel a complete and reliable project partner. Our consultants can help you exploit your available space optimally with the right system and the right accessories. If your requirements are such that none of our standard systems match them, we will simply develop a customised solution for
