FOCUS ON CUSTOMER SATISFACTION

BRUYNZEEL

Solutions for an inspiring office

Office Solutions

Bruynzeel

Customer satisfaction is our goal. To achieve this, we team up with our clients and develop a solution that suits them in every detail. A solution that will match the dynamics of their office environment, efficiently and beautifully. And produced according to environment-conscious methods. Office solutions by Bruynzeel add to a pleasant and inspiring working climate.

Focus on efficiency

In our office solutions, you will discover the enjoyment of working in an efficiently arranged office. An office in which you are able to move around comfortably, knowing that you will be able to easily locate any particular piece of information you require in an instant.

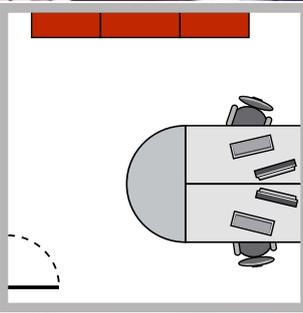

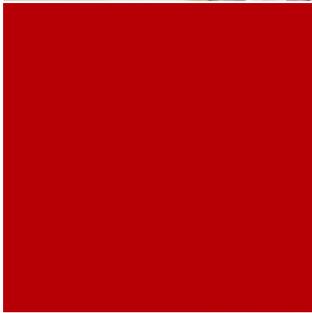

Focus on design

Our products will flexibly fit around your needs. Design and finish can be made to match your taste and preferences.

FOCUS ON CUSTOMER SATISFACTION

SYSKO®

Versatile modular solution

Office Solutions

Sysco®: focus on flexibility

Take for example the versatile Sysco® system. This modular system, with multiple depths and heights, will flushly fit the available office space, and can be flexibly adjusted to changing office needs. The stylish system is available in a variety of either open or closed designs. The system's colours are applied using a powder coating, guaranteeing 100% coverage. Whatever your filing system, Sysco® will adapt to your office, taking into account your needs and wishes.

User friendly accessories

Multi-functional suspended file

Sysco® accessories: focus on multifunctionality

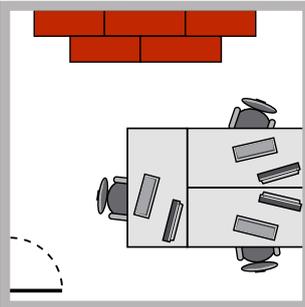

Clever, multifunctional accessories enhance this system's versatile applicability. A fine example is presented by Bruynzeel's multi-functional suspended file - suitable for under-shelf filing and filing in pull-out frames.

Maximum flexibility

SIDE2SIDE

Easily accessible extra storage capacity

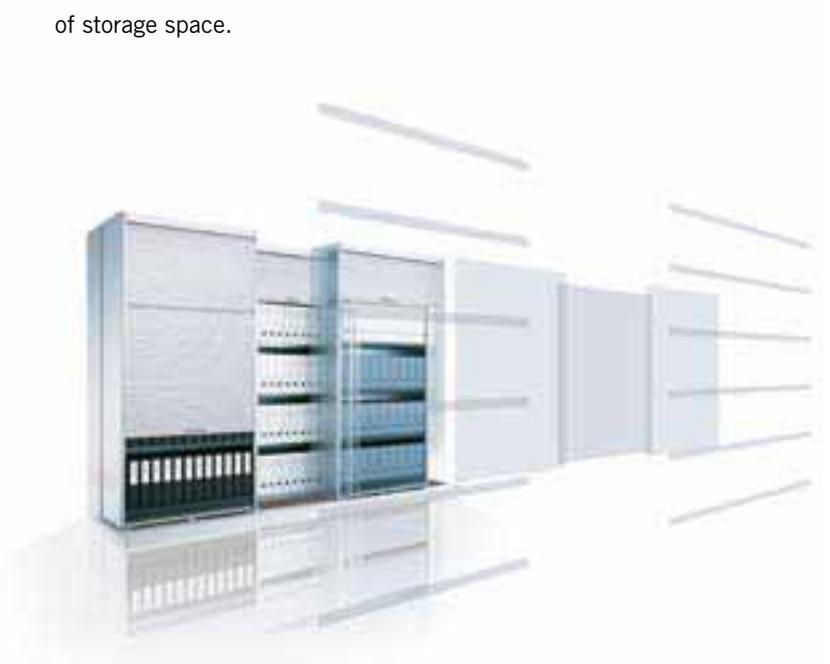

Office Solutions

Easily accessible

Side2Side: focus on extra storage capacity

Create extra storage capacity that's barely perceptible, yet highly effective. While saving wall space in an ingenious way, the Side2Side system places a row of mobile cabinets directly in front of a row of office cabinets and provides a wealth of storage space.

Easily and safely to move

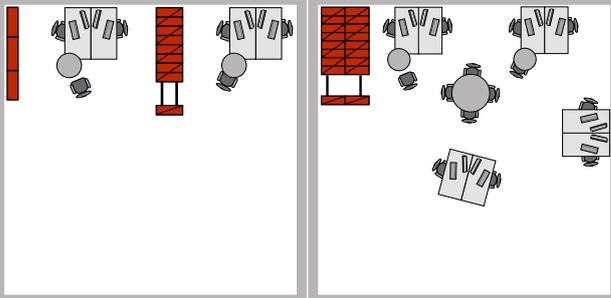

Side2Side: focus on accessibility

Your daily files are at your fingertips. And even the less frequently used documents are within easy reach, by smoothly sliding aside the cabinet on its rails. End stops and anti-tilting design ensure safe handling. The Side2Side system is easily moved and extended as offices change.

COMPACTUS® OFFICE

Create an extra workplace

Information
stored confidentially

Office Solutions

Compactus® Office: focus on extra space

Create additional storage space or extra workplaces using the ergonomically designed Compactus® Office system. Two-sided accessibility allows shared storage and use in open offices. To further enhance this openness, choose for the low-height version. The ergonomic hand wheel – which emphasises the dynamics of your office

environment – ensures ease of operation. This user friendliness is further boosted by a ramp for easy access of trolleys.

User friendliness

Compactus® Office: focus on confidentiality

Facilities that guarantee confidential and secured storage, and prevent unauthorised access include a closing mobile, a hand-wheel lock, and sliding doors.

Compactus® Office: focus on design

The specially designed front panels may be finished in a range of colours and materials to suit your office interior.

COMPACTUS® OFFICE ELECTRO

Comfort

Office Solutions

Convenience

Compactus® Office Electro: **focus on comfort**

One-touch operation of the touch panel provides unparalleled ease of operation of the Compactus® Office Electro - even if you have your hands full. A single, gentle touch is all that is needed

to provide smooth and quick access to the spacious interior of this latest, innovative addition to the Bruynzeel range. Vibration-free movement, thanks to the soft start and soft stop, ensures that documents stay in place during retrieval.

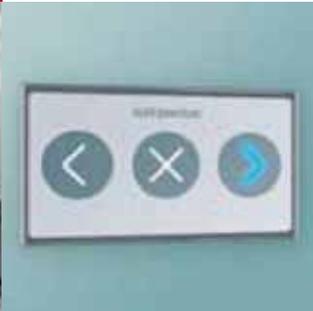

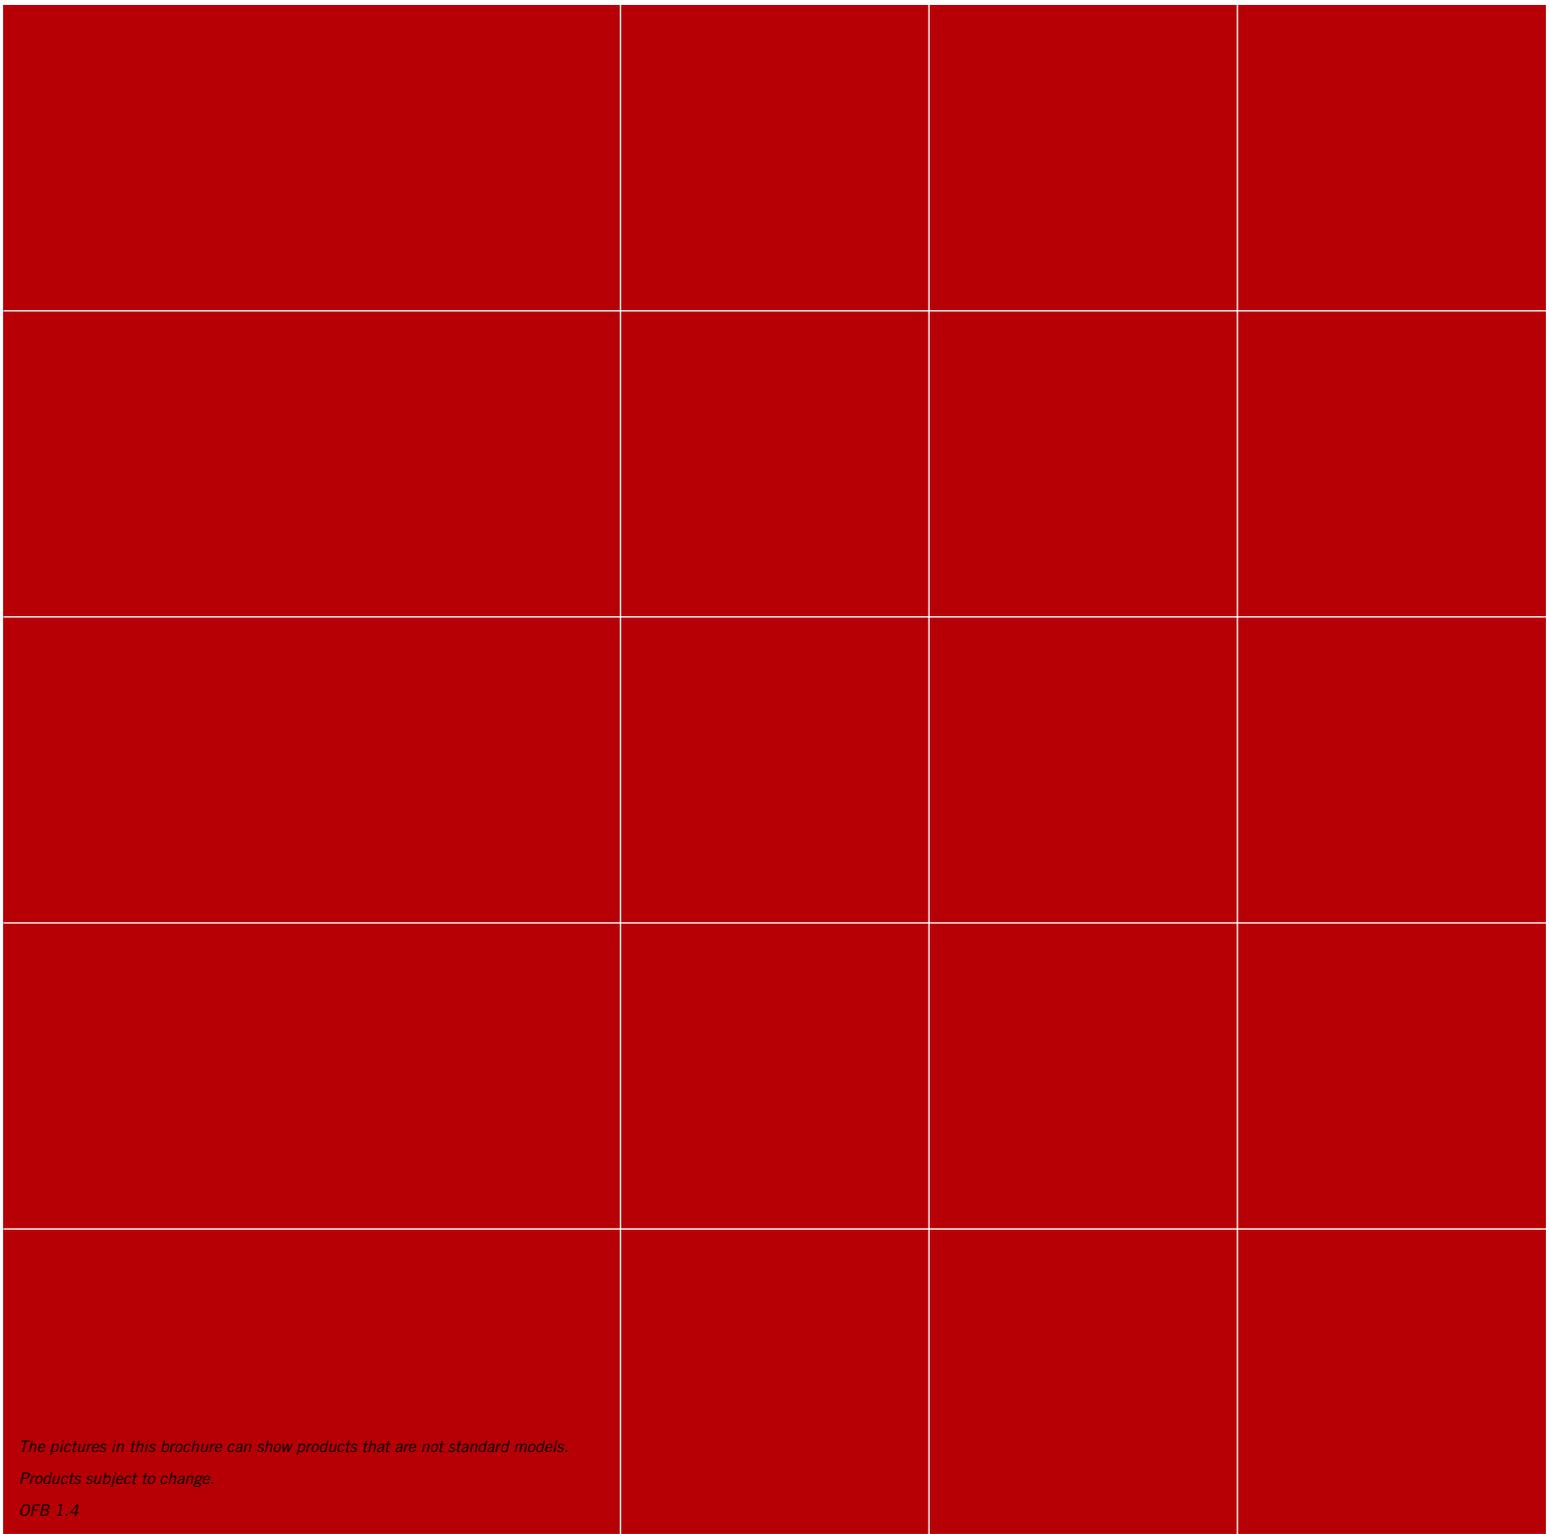

Compactus® Office Electro: **focus on simplicity**

The touch panel has been designed for simplicity in use. Controls are self-explanatory so that no specific training is needed.

Compactus® Office Electro: **focus on safety**

User safety is ensured using the Motor Current Monitoring System (MCMS). This feature stops the mobiles, should another user attempt to move the installation while a person is inside.

The pictures in this brochure can show products that are not standard models.
